OVERVIEW

After passionately building my web development skills for more than a year, I am excited and highly motivated to enter the web development field and bring my varied skills and interests to a dynamic team. Eight years of experience in the brain injury rehab field have honed my planning, organization and communication skills.

SKILLS

I have experience building full-stack web applications using HTML CSS and JS, React.js, Node.js, Express.js, MongoDB and Mongoose, PostGreSQL and Sequelize, and using Git and Github in a team setting. I enjoy the challenge of learning new technologies to contribute to humankind's greatest invention.

EXPERIENCE

Wegmans, Cary, NC - *Cashier (part-time)*

AUG 2023 - PRESENT
